

BUILT TO BE THE BEST.

ARM-MATIC™

ALUMINUM TARP SYSTEM

D009FL-0819

STANDARD FEATURES

- Tarp Spool with Side Plates
- Tarp Spool with Aluminum Housing - 98" and 104"
- Galvanized Steel Crossover Bar - 2-Piece
- Aluminum High-Gloss Pivot Arms
- Durabuilt™ Motor with 3-Year Warranty
- Rocker Switch

WORRY-FREE OPERATION NO MATTER THE APPLICATION

Whether you are hauling gravel, coal, scrap metal or rock, you need a tarp system that is as dependable as the rest of your equipment. Donovan® understands that downtime costs you money and there is no worse situation than to be down because of a failed tarp system.

The Arm-Matic™ was designed with reliable and durable operation in mind. For applications from dump trucks to end dumps, Donovan® has the set up you need to meet your tarping needs. Conditions aren't always ideal for using tarps, which is why the Arm-Matic™ was designed for ease-of-use and ease-of-repair.

- 4-Spring Side Mount - Up to 18'
- 5-Spring Side Mount - Up to 24'
- Torsion Spring Hex Shaft - Up to 28'
- Torsion Spring with Hex/Round Shaft - Up to 37'
- Standard and Frameless Options Available

1125832	Arm-Matic™ UL37	102"	Straight 20'	Underrail Torsion	100'	Rocker Switch

Finer Tension Adjustment

On longer applications, high-strength steel alloy pivot shafts feature a milled hexagonal shape for finer tension adjustments than square profiles commonly used in the industry. The cast steel hexagonal pivot connector is also nickel-chrome plated for lasting corrosion resistance and lasting good looks.

Increased Corrosion Resistance

The 1-piece extruded aluminum arms and windshield are anodized to reduce wear and scratching while providing improved corrosion resistance that you don't get with regular polished aluminum arms. (If arm length is over 14', arms will not be finished.) All exposed steel components and brackets are plated for increased corrosion protection.

Arm Options

For shorter applications that need to clear doors or loading areas, the arms come with a 2-foot, 30-degree bend. On longer applications, the system comes standard with straight arms.

Standard Electric System

The Arm-Matic™ comes standard with our Durabuilt™ motor backed by a 3-year limited warranty. All wiring, cable ties and connectors necessary for installation are included in the system when you receive it. The standard electric system also comes with a rocker switch that can be mounted in the cab for safe, reliable operation.

Gatorshield® Tough

A 2-piece assembly allows the crossover/tarp tube to be custom fit to any width trailer. Built from strong Gatorshield® galvanized steel tubing, the elbows provide a strong transition from the arms to the tarp tube while keeping corrosion resistance in mind.
