

BUILT TO BE THE BEST.

SIDEWINDER™

AUTO SIDE-FLIP SYSTEM

D012FL-0819

STANDARD FEATURES

- Universal Components (Fit Either Side of Trailer)
- Right Side/Left Side Mounting Hinges (Mount to Either Side)
- Electric/Hydraulic Power Unit (Self Contained)
- Hydraulic (Wet) Valve Kit - Standard on Wet Kits
- Pre-assembled Head Assemblies
- Forward/Rear/Over-Center Arm Brace Locations
- Steel Frame - Standard on Sidewinder™ Kits
- Aluminum Frame - Standard on Sidewinder™ 350 Kits

THE ORIGINAL SINGLE LID COVERING SYSTEM

The Sidewinder™ has modular and interchangeable components that fit either side of trailer. (Although parts and hinge mount hardware are universal, order driver side or curb side for proper head mount.) Your choice of electric or hydraulic – the system is fully automatic, covering and uncovering in under 20 seconds and keeping the operator safely on the ground.

Years of experience and thousands of units sold mean The Sidewinder™ has been thoroughly field-tested based on extensive customer feedback. It's an extremely affordable system, paying for itself in a few months and noted for low maintenance costs. It fits all front wall styles and the lid rests flush against the trailer – ideal for operating in narrow transfer stations. The system is engineered to flex during loading and unloading, without troublesome continuous drive shafts. The superior 3-arm design (one forward, one rear and one over trailer center brace) allows the tarp to properly conform to peaked areas in the load and still close down on all sides.

FITS TRAILERS - UP TO 53' x 102'

Complete system part numbers with options.

PART NO.	KIT NAME	VALVE KIT	HINGE	FEATURES	ELECTRICS
1800297	Sidewinder™	Steel	Left	Electric/Hydraulic	Toggle Switch
1801908	Sidewinder™	Steel	Right	Electric/Hydraulic	Toggle Switch

SIDEWINDER™

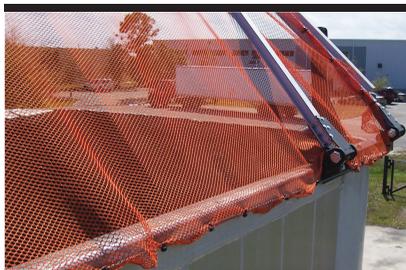

AUTO SIDE-FLIP SYSTEM

MEET WEIGHT REQUIREMENTS WITHOUT SACRIFICING DURABILITY

The Sidewinder™ 350's modular and interchangeable components fit either side of the trailer and do an excellent job of sealing the load. (Although parts and hinge mount hardware are universal, order driver side or curb side for proper head mount.) Choose electric or hydraulic – system is fully automatic, covering and uncovering in under 20 seconds while the operator stays safely on the ground.

Aluminum I-beam construction provides unsurpassed strength without unnecessary weight while twin cable design eliminates support ladders and bars. The Sidewinder™ 350 fits all front wall styles and rests flush against trailers, flexing during loading and unloading to accommodate stresses. The unique light-weight two-arm design (one forward and one rear) lets the tarp conform to heaped loads and still seal on all sides, avoiding loaders and areas where loads are typically highest.

Head assembly comes preassembled – no welding is needed! Kits contain hardware only. Either tarp listed will fit either of the Sidewinder™ 350 kits.
