

GSP Marketing Inc.  
Manufacturer of

**MP8000 M2-106**  
**Dual Stand-UP Drive COMBO**

## MULTI-PURPOSE REFUSE/RECYCLING DUAL STAND-UP DRIVE

**The most efficient and safe collection truck built**

**Independent side loading along with dual stand-up drive cab design allows two operators to work more efficiently.**

**This first-of-a-kind truck is built exclusively in cooperation with:**

**Built with seamless Hardox® 450 steel:**

- Body floor, sides and roof
- Hopper floor and sides
- Packer guides, track and shoes

**Available in 13 to 37  
Cubic Yard Capacity  
in Single and Tandem Axle**

**MP8000 M2-106**  
**Dual Stand-UP Drive COMBO**

**Designed, engineered and built for ease of operation**

**Why the MP8000/M2-106 Dual Stand-UP Drive COMBO is the right choice over a conventional rear loader:**

- Reduced labor costs
- Lower up front cost than low cab forward and/or drop frame configurations
- Reduced fuel consumption
- Lower insurance costs
- Less effort for crew
- Safer—no riding on rear or side of vehicle
- More efficient operation on dense city routes, in alleys, and on streets with on-street parking, dead ends or tight cul-de-sacs

#### **Chassis**

Freightliner® M2-106 by Fyda Freightliner

- Best conventional cab maneuverability available
- Leading conventional cab stand-up drive visibility in the industry
- Reliable Cummins® ISC engine
- Durable Allison® 3500 RDS six-speed transmission

#### **Cab**

by Fontaine® Modification

- Convenient dual operating positions if needed
- Safe in-cab transit for workers from stop-to-stop
- Easy step, low-entry cab access on both sides
- Optional dual or single steering position(s)

#### **Body**

G-S Products

- Large 1.5 cubic yard receiving hoppers
- Independent dual side loading allows two operators to load material at the same time
- Simultaneous dumping of carts, loose trash, compost, bagged trash, or single stream recycling from both sides
- Fuel efficient engine idle operation
- Low maintenance—single cylinder loading operation (patented)
- Safe and stable full eject horizontal unloading—no telescopic cylinder
- No chassis drop frame required
